

School Improvement Plan Connection: Students will demonstrate strategic use of logic, evidence, and reasoning when communicating thinking. Additionally, they will independently make sense of contextual and mathematical problems.

TSES/Title I presents

Building Reasoning through Perspective

Transportation available upon request

Last year* we engaged parents by THINKING about THINKING. This year, we will build on those skills by exploring how PERSPECTIVE impacts REASONING. We'll share ideas of how to encourage kids to change their perspective in order to develop reading, math and overall reasoning skills.

November 14th from 6:15 to 8:00 p.m. @TSES

All attending families will receive a Dog Pile or Cat Stacks puzzle
and a Fitness Finder charm!

Students and parents will rotate through reading and math sessions separately.
Technology sessions will be students and parents working together.

*Powepoint presentation and handouts from last year's event *Developing Thinkers, Not Performers*, can be found on our website. Visit tses.hcps.org and click on the box titled "Quarterly Events and At Home Learning".

Please respond by Monday, November 11th. Please return this slip, even if you cannot attend.

_____ **Our family will attend.**

_____ Number of children preK and younger (babysitting for children 3-5 years old)

_____ Number of children grades k-2

_____ Number of children grades 3-5

_____ **Our family is unable to attend.**

Student(s) Name(s): _____

Will you need transportation to this event? YES NO (circle one)

If yes, please tell us your name and phone number: _____

****Teachers, please return these slips to Mrs. Glassband****
