

REASONERS	PERFORMERS
Can you think of a related problem or one that will make it easier?	What happened after the fox walked into his house?
Can you think of a time when that strategy wouldn't work?	Start at number 5 because that's the easiest clue?
What are some vocabulary that isn't important to think about and what will help us decide what's important?	This one is odd, what does that tell you?
Look at the directions what are you trying to figure out?	It says 2 digits are the same so remember to use that
What do you notice about the clues?	Look at the first letter in the word.
What information stands out that is really important?	Look in the 2nd sentence at the word digit. What's a digit again?
Ask me a question about one of these words.	Do you know all of these words?
How can we keep track of what will and won't work?	Let's list all possible digits on the bottom and cross out as we go.
What do you notice about the numbers/problem asked?	Now that you have the first clue, try this one.
What do you think you need to do to find out?	Think about all the numbers that can be added together to make 17.
How can you explain the problem in your own words?	Where did the boy go on his bike?
How did you know the mouse was afraid?	What sound does "k" make?
What are some things you want to ask the author?	
Tell me why you think this is a fantasy story.
